

Parallel and Distributed Computing Final Exam Instructions

You have 5 Levels of questionnaires, a total of 15 questions.

Each level has its corresponding points per question.

Select ten questions in any combination from the given questionnaires.

Your objective is to reach at least 50 points.

For programming questions, you have to post the source code of your answer and the screenshot of your output.

For essay questions, answer as comprehensively as possible. I will not consider any short answers. Try to at least answer in one paragraph.

Post your answers on any of the following options, Blog, Github Repository, or Github Pages.

You can email me your submission using the SUBJECT: `LASTNAME.FIRSTNAME_PARALLEL_EXAM` containing the link of your blog, GithubRepo or Github Page.

Note.

If you're using GithubRepo/Page make sure to make it public or give me access to said repository.
